

# Beneath Southern Seas

---

## OCEAN ISSUES

---

Presented by award winning underwater filmmaker George Evatt.

Extremely positive - Students were engrossed in it all - Loved the footage and George's information - Really pitched at the right level. It was just so good and well presented - Discussed important ideas the students should be aware of. (Yr 10 & 11)

St Peter's Collegiate Girls School SA

During the presentation and in subsequent discussions, students responded with a very high level of interest and appreciation of both content and style of delivery and the quality of the photography included. (Yr 10 & 11)

Wodonga Senior Secondary College VIC

George maintained student's attention and interest extremely well. Flexibility of the show and the availability of changes and extension were impressive. (Yr 8-12)

Woodville High School SA

Students found the presentation interesting and some reported that George was "inspiring". It fits well with the Sustainability theme. (Yr 9)

Galen College VIC

This presentation was a real eye-opener. I would highly recommend this talk to anyone with an interest and concern about the current state of the world's oceans.

Narabeen Coastal Environment Centre NSW

Increasing human pressures are having a major effect on the world's oceans. Scientists now estimate that the number of large fishes, such as sharks and tuna, has decreased by 90% in the past 50 years. This presentation explores some of the urgent issues facing our marine world today, including:

- Protecting our ocean & sustainability
- Ocean resources
- Threatened species
- Marine Protected areas
- Antarctica & whaling
- Acidification of the ocean
- Threats to coral reefs
- Overfishing
- Aquaculture
- How we can help

George is a multi award winning underwater filmmaker and more than 82,000 students have already seen his 1st presentation. His documentaries have screened internationally on the **National Geographic Channel** and in Australia on the **Seven, Nine, ABC** and **SBS** networks. George's awards include the **Gold Tripod** for Best Nature and Wildlife Film, 1998 (Australian Cinematographers Society) and the **Palme D'Argent**, France 1999 (World Festival of Underwater Films). In 2003 he won **Best Film** at the Australian Oceans Film Festival and in 2004 George received the prestigious **Whitley Medal** (Royal Zoological Society of NSW) for best publication on the natural history of Australian animals.
